Building a Portfolio and Hosting it on GitHub

I am Athul Cyriac Ajay

Github Campus Expert, Lead-Open Source Club

S2 CS,CEK

Goto `github.com` and create an Account.
After creating, Create a Repository by clicking the `+`
symbol on the top right corner of GitHub.
Give the repository `your_github_username.github.io` You
can either initialize with or without the Readme

Let's Start by Adding you to Git on your Machine

Type in this command in your Terminal(without '$' symbol)

- $ git config --global user.name "Your Github-UserName"

- $ git config --global user.email "Your Github Email"

Now go to the Folder on your System with your Website's Files

Type `$ cd "path of your workfiles"`

Now we can **Initialize the Repository with Git**

Type `$ git init`

Now we need to add the Remote of the Repository

`$ git remote add origin https://github.com/your_github_username.github.io.git`
This can also be found from your repository site on Github and you can copy paste it here.

Stage it!!!

Type `$ git add -all`
This will Stage all the files before Commiting

Commit it!!!

Type `$ git commit -m "A Message"`
This will commit all the files....

Push it!!!

Type `$ git push -u origin master`
You maybe asked to type in your Github id and Password.
Type those in and got to github.com

Is it here?

Refresh the page.... You can find all these files here....
